*New matter  
for review*

BOARD OF REGENTS  
OF THE  
UNIVERSITY OF OREGON.

NAME.	RESIDENCE.
HON. S. H. FRIENDLY . . . . .	Eugene.
HON. C. B. BELLINGER . . . . .	Portland.
HON. CYRUS A. DOLPH . . . . .	Portland.
DR. S. HAMILTON . . . . .	Roseburg.
HON. C. C. BEEKMAN . . . . .	Jacksonville.
N. L. BUTLER . . . . .	Monmouth.
HON. WM. SMITH . . . . .	Baker City.
HON. R. S. BEAN . . . . .	Salem.
HON. CHARLES HILTON . . . . .	The Dalles.

OFFICERS OF THE BOARD.

HON. R. S. BEAN . . . . .	President.
HON. JOSHUA J. WALTON . . . . .	Secretary.
HON. A. G. HOVEY . . . . .	Treasurer.

THE University of Oregon is a State institution, and a part of its general educational system. It is composed of the following departments: COLLEGE OF SCIENCE, LITERATURE AND ARTS; COLLEGE OF MEDICINE; COLLEGE OF LAW. The College of Science, Literature and Arts is located at Eugene. The Colleges of Medicine and Law, while virtually also at Eugene, are practically carried on at the city of Portland, because of the obvious advantages to be found in a metropolis for the successful prosecution of medical and legal courses.

*New matter*  

---

## DEPARTMENTS OF THE UNIVERSITY.

---

### COLLEGE OF SCIENCE, LITERATURE AND ARTS.

---

#### THE CLASSICAL COURSE.

1. This course gives four years of Latin and four of Greek.
  2. The mathematics required in the Freshmen year is Trigonometry, Determinants and Analytical Geometry. The time given to each of these subjects will depend each year upon the judgment of the professor of mathematics.
  3. Students who wish the distinction of taking the regular Classical Course must make no elections before the Sophomore year.
  4. All students having no English Literature in their Freshman year must do a prescribed amount of reading in English authors under the direction of the Faculty.
- 

#### THE SCIENTIFIC COURSE.

---

1. Students following this course without elections will have four years of Latin and three years of French or German. The student has an option between French and German. Those who wish to pursue advanced scientific studies will find the modern languages more useful than the ancient; the best works of science will now be found in French, German or English.

2. The advanced Physics cannot be taken without a knowledge of the Calculus; the advanced Chemistry requires less mathematics than the Physics, but all Scientific students are urged to take the Calculus.

3. A course in Civil, Mining and Electrical Engineering has been introduced.

---

### THE LITERARY COURSE.

---

This course gives four years of Latin and a year of Anglo-Saxon. It will be found very rich in English Literature.

The general regulations for the scientific work and English are the same as the other courses.

---

### THE ENGLISH COURSE.

---

In accordance with a resolution of the Board of Regents, an English course of four years has been adopted.

For further information relating to the College of Letters address

UNIVERSITY OF OREGON,  
Eugene, Oregon.

## THE SCHOOL OF MUSIC.

Instruction is given on the Piano-forte, Organ and Violin, and in Voice Culture, Harmony, Theory and History of Music.

For further information address

UNIVERSITY OF OREGON,  
Eugene, Oregon.

## COLLEGE OF LAW.

PORTLAND, OREGON.

The Law School is held in the city of Portland, a metropolis which offers great advantages to students of law, having an intelligent bar and excellent libraries, and affording an easy access to the courts.

The entire course consists of two sessions of about thirty weeks each, from October to May, inclusive. The 16th Annual Session will open about October 2d, 1899.

PROF. R. H. THORNTON,  
Portland, Oregon.

---

COLLEGE OF MEDICINE.

---

---

FACULTY.

---

FRANK STRONG, PH. D.

*President.*

HENRY E. JONES, M. D.

*Emeritus Professor of Clinical Gynæcology.*

CURTIS C. STRONG, M. D.

*Emeritis Professor of Gynæcology.*

S. E. JOSEPHI, M. D.

*Dean of the Faculty; Professor of Obstetrics and Nervous Diseases.*

ERNEST F. TUCKER, A. B., M. D.

*Professor of Gynæcology.*

HOLT C. WILSON, M. D.

*Professor of Principles and Practice of Surgery.*

OTTO S. BINSWANGER, PH. D., M. D.

*Professor of Chemistry and Toxicology.*

K. A. J. MACKENZIE, M. D., C. M., L. R. C. P. & L. R. C. S. Edin.

*Professor of Theory and Practice of and Clinical Medicine.*

RICHARD NUNN, A. B., B. CH., M. D.

*Professor of Diseases of Eye, Ear, Nose and Throat.*

J. F. BELL, M. D., L. R. C. P., Lond.

*Professor of Materia Medica and Therapeutics.*

M. A. FLINN, M. D.

*Professor of Physiology.*

G. M. WELLS, M. D.

*Professor of Pædiatrics.*

*Lecturer on Medical Jurisprudence.*

E. P. GEARY, M. D.

*Lecturer on Physical Diagnosis.*

C. H. WHEELER, M. D.

*Lecturer on Hygiene.*

---

JOHN M. BROOKE, M. D.

*Demonstrator of Anatomy.*

J. E. LABBE, M. D.

*Asst. Demonstrator of Anatomy.*

session  
October 2, 1899.  
at the commence-  
session, so that they may not lose the benefit of  
ledge to be derived from the opening lectures.

Examinations for matriculation may be arranged with  
the Dean at any time.

Special examinations in Latin and Physics for conditioned  
matriculates will be held during the first week of the session;  
during the same period the Fall examinations will be held  
for advancement to second, third or fourth year stand-  
ing for those who failed to attain the requisite number of

GOOD SAMARITAN HOSPITAL—TWENTY-THIRD AND LOVEJOY STREETS.

the practical instruction of students in urinary analysis and other chemical examinations. A course of practical laboratory work by students is an essential of the requirements.

### **THEORY AND PRACTICE OF MEDICINE.**

During the third and fourth years, as per outline, Prof. Mackenzie will bring into prominence, in this branch, the essentials of theoretical and practical medicine, dwelling more particularly upon those subjects which will be likely to prove of most substantial use to the young practitioner, while not neglecting theoretical essentials. Teaching in this branch will be illustrated by clinics at the college and hospitals. Prof. Wells will deliver lectures upon Diseases of children. Prof. Josephi upon Diseases of the Nervous System. Dr. Wheeler upon Hygiene and Dr. Geary upon Physical Diagnosis. Prof's. Bell and Mackenzie will hold medical clinics at St. Vincents Hospital and Prof. H. C. Wilson at Good Samaritan Hospital.

### **ANATOMY.**

Prof. Cauthorn will give instruction\* in General and Descriptive Anatomy. This subject will be considered during first and second years and finished at the end of the second year. These lectures will be illustrated by actual dissections, charts and drawings, and special attention will be given to the surgical relations of the subject. During the first year a course on Osteology and Syndesmology will be completed. A "bone room" has been added to the conveniences of the college. This will be conducted for the benefit of such students as desire to borrow bones for purposes of study. Those wishing to avail themselves of this privilege will be required to deposit a guarantee fee of three dollars each, which will be returned at end of session, if no bones stand charged against the depositor.

Special arrangements have been made for storing dissecting material, so that no shortage need be apprehended. A sufficient supply for the beginning of the course will be on hand and utilized as soon as desirable. The Demonstrator will be on duty daily (except Saturday) as per schedule of lectures, as special attention will be given to this branch during first and second years.

### **MATERIA MEDICA AND THERAPEUTICS.**

Prof. Bell will direct attention during first and second years to remedial agents and to the actions of medicines proper, with particular reference to their practical application. Specimens of the various medicines will be exhibited to the class and attention given to Electro-therapeutics.

### **BACTERIOLOGY.**

Dr. A. E. Mackay will deliver practical lectures on Bacteriology to fourth year students.

The Bacteriological Laboratory is supplied with all the necessary apparatus including incubators and sterilizers with thermostats and thermometers for a very full course.

Each student receives instruction in Bacteriological technique including best methods of examining sputum, staining etc., and a number of different bacteria will be cultivated and studied, such as Typhoid, Diphtheria, Cholera, Tubercle, etc.

### **MICROSCOPY, HISTOLOGY AND PATHOLOGY.**

Dr. Yenny will deliver a practical course on the use of the microscope, histology and pathology. This will include the study of microscopical examinations of pus, blood, urine, etc.

To illustrate the lectures on histology and pathology a course will be given on section cutting, staining, mounting etc.

Histology will be considered during the second year and pathology by third year students. This course will be thoroughly practical and will be taught almost exclusively by laboratory methods.

### **OBSTETRICS.**

This subject will be taught during second and third years as per outline. Prof. Josephi will illustrate the lectures upon this branch by charts, diagrams, specimens, etc. All the principal obstetric operations will be demonstrated on the manikin in presence of the class, and members of the graduating class will be required to perform certain operations and instrumental applications on the manikin before the class.

Opportunities for clinical work will be furnished to the graduating class, and labor cases will be entrusted to individual members under proper direction, thus insuring an eminently practical knowledge of this important branch. Prof. Curtis C. Strong will conduct the clinical work in midwifery at Good Samaritan Hospital.

### **GYNÆCOLOGY.**

This branch will be taught didactically during third and fourth years by Prof. Tucker. Prof. A. J. Giesy will give clinics in Gynæcology once each week at Good Samaritan Hospital. Practical instruction will be given in the use of the speculum and other instruments for the diagnosis and treatment of diseases peculiar to women, and every opportunity given for students to familiarize themselves with their use and application

### **PHYSIOLOGY.**

Lectures upon this subject will be delivered during first and second years by Prof. M. A. Flinn and Dr. A. D. Mackenzie and will be illustrated by demonstrations which will occupy a prominent place.

### **DISEASES OF THE NERVOUS SYSTEM.**

Lectures on Nervous Diseases including Insanity will be delivered by Prof. Josephi during fourth year. In this course special Nervous Diseases not included in the lectures of others will be dwelt upon.

### **OPHTHALMOLOGY, OTOTOLOGY, RHINOLOGY AND LARYNGOLOGY.**

Prof. Nunn will deliver lectures upon these subjects to third and fourth year students and will give special attention to methods of diagnosis and treatment of diseases of the parts involved. Practical clinical training in the use of the ophthalmoscope, specula, laryngoscope and instruments for local applications, will be given. Clinics in Good Samaritan Hospital.

### **GENITO-URINARY DISEASES.**

Prof. Saylor will, in addition to clinics on surgery at the Good Samaritan hospital, deliver didactic lectures on Diseases of the Genito-Urinary Organs during third and fourth years. Lectures will be illustrated by drawings, models, etc., and numerous cases at the bedside in the hospital. Practical instructions in the use of instruments will be given.

### **PAEDIATRICS.**

Prof. G. M. Wells will bring before the students during third and fourth years a wide range of subjects in connection

and Therapeutics (final); Hygiene; Obstetrics; (Pelvic Anatomy, Embryology and Normal Labor.)

### THIRD YEAR.

Theory and Practice of Medicine, General Therapeutics,  
Principles and Practice of Surgery and Bandaging.  
Pathology with Laboratory Work,  
Pædiatrics,  
Dermatology,  
Gynæcology,  
Genito-Urinary Diseases,  
Physical Diagnosis,  
Ophthalmology and Otology,  
Obstetrics,  
Clinics, all,

Examinations in Principles of Medicine; Principles of Surgery; Pathology (final); Gynæcology; Physical Diagnosis; Obstetrics (final); Dermatology; Diseases of Genito-Urinary Organs; Ophthalmology and Otology.

### FOURTH YEAR.

Medical Jurisprudence,  
Theory and Practice of Medicine,  
Principles and Practice of Surgery,  
Military and Operative Surgery,  
Clinics, all,  
Gynæcology,  
Genito-Urinary Diseases,  
Ophthalmology and Otology,  
Rhinology and Laryngology,  
Bacteriology, with Laboratory Work,  
Pædiatrics,  
Insanity and Diseases of Nervous System.  
Examinations: Final in above.

## SCHEDULE OF LECTURES, 1899-1900.—FIRST YEAR.

HOURS.	MONDAY.	TUESDAY.	WEDNESDAY.	THURSDAY.	FRIDAY.	SATURDAY.
9:00-10:00	Chemistry. Prof. Binswanger.	Materia Medica and Pharmacy. Prof. Bell.	Chemistry. Prof. Binswanger.	Materia Medica and Pharmacy. Prof. Bell.	Chemistry. Prof. Binswanger.	Materia Medica and Pharmacy. Prof. Bell.
10:00-11:00	Physiology. Prof. Flinn.			Physiology. Prof. Flinn.	Study Hour.	Physiology. Dr. A.D.Mackenzie
11:00-12:00	Anatomy. Prof. Cauthorn.			Anatomy. Prof. Cauthorn.	Osteology, etc. Prof. Cauthorn.	Anatomy. Prof. Cauthorn.

Hygiene .....	Coplin & Bevan.	Rohe.
Bacteriology .....	{ Mallory & Wright.	Sternberg
	{ Elements of Lat-	
Latin .....	{ in by Crothers	
	{ & Bice.	

## Hospital Appointments.

Arrangements have been perfected by which the college has in its gift two appointments each year of house surgeons to the Good Samaritan Hospital. Each appointment is for one year, during which time board and lodging will be furnished free at the hospital. An excellent opportunity is thus afforded to the graduate to acquire in the wards of a well equipped hospital, without any expense, a practical knowledge by clinical experience and actual practice. The house surgeons of St. Vincent's Hospital are also supplied from the alumni of this college.

## Prizes.

### SAYLOR MEDAL.

The Saylor Gold Medal, founded by Prof. Saylor, will be awarded to the graduate passing the best examination in all branches. Provided all such examinations must have been passed in this school in regular sequence and at the appointed time in the spring.

### KOEHLER MEDAL.

The Koehler Gold Medal, founded by Dr. George F. Koehler, will be awarded to the undergraduate who obtains the highest total mark in Anatomy in final examination in that branch. Provided such mark is obtained in this school at the regularly appointed years for such examination. The medal will be presented to the winner only at the time of graduation from this college.

### MEDALISTS 1898-99.

SAYLOR MEDAL—A. B. Sedgwick, M. D.

KOEHLER MEDAL—L. H. Hamilton.

### REQUIREMENTS FOR ADMISSION.

This school is a member of the Association of American Medical Colleges and will conform to its requirements as set forth in the following extract from the constitution of the Association:

#### ARTICLE III.

SECTION I.—Each college holding membership in this Association shall require of each student, *before admission* to its course of study, an examination the minimum of which shall be as follows:

1. In *English*, a composition on some subject of general interest. This composition must be written by the student at the time of the examination, and should contain at least 200 words. It should be criticised in relation to thought, construction punctuation, spelling and handwriting.

2. In *Arithmetic*, such questions as will show a thorough knowledge of common and decimal fractions, compound numbers, and ratio and proportion.

3. In *Algebra*, such questions as will bring out the student's knowledge of the fundamental operations, factoring and simple quadratic equations.

4. In *Physics*, such questions as will discover the student's understanding of the elements of mechanics, hydrostatics, hydraulics, optics and acoustics.

5. In *Latin*, an examination upon such elementary work as the student may offer, showing a familiarity usually attained by one year of study; for example, the reading of the first 15 chapters of Caesar's Commentaries, and the translation into Latin of easy English sentences involving the same vocabulary.

SEC. 2.—In place of this examination, or any part of it, colleges, members of this Association, are at liberty to recognize the official *certificates of reputable* literary and scientific colleges, academies, high schools and normal schools, and also the medical student's certificate issued by any State examining board covering the work of the foregoing entrance examination.

SEC. 3.—Colleges, members of this Association, may allow students *who fail in one or more branches* in this entrance examination the privilege of entering the first year course, but such students shall not be allowed to begin the second course until the entrance requirements are satisfied.

SEC. 4.—Colleges, members of this Association, are free to honor official *credentials issued by medical colleges of equal requirements*, except in the branches of study embraced in the last year of their own curriculum.

SEC. 5.—Candidates for the degree of Doctor of Medicine in the year 1899 and thereafter shall have attended at least *four courses* of medical instruction, each course of at least six month's duration, no two courses of which shall have been in the same calendar year.

SEC. 6.—Colleges, members of this Association, are free to give to students who have met the entrance requirements of the Association, additional *credit for time* on the four-year course as follows: (a) To students having the A.B., B. S., or equivalent *degrees* from reputable literary colleges, one year of time. (b) To graduates and students of colleges of *homeopathic* or *eclectic* medicine, as many years as they attended those colleges, provided they have met the previous requirements of the Association and that they pass an examination in *materia medica* and therapeutics. (c) To graduates of reputable colleges of *dentistry*, *pharmacy* and *veterinary* medicine, one year of time.

## CATALOGUE OF STUDENTS.

FOR

Session 1898-99.

John B. Roth .....	Portland, Or.

UNIVERSITY OF ILLINOIS.

THE REGULAR COURSE OF LECTURES WILL BEGIN  
TUESDAY, OCTOBER 1, 1901  
AND CONTINUE SIX MONTHS

PORTLAND, OREGON:  
THE ANDERSON PRINTING & LITHO. CO.  
1901.

## CALENDAR 1901-1902.

---

First Semester .....October 1 to December 25.

Fall examinations held during the first week in October, 1901.

Regular Course begins .....October 1, 1901.

Opening Lecture .....October 1, 9 A. M.

Thanksgiving Day—Holiday to following Monday.

Christmas Vacation, December 24, 1901, to January 2, 1902.

Second Semester.....January 2 to April 1.

Washington's Birthday—Holiday.

Spring Examinations during last two weeks in March; 1902.

Commencement.....April 1, 1902.

Name and Address.	Term Expires.
Hon. Salathiel Hamilton, Roseburg .....	April 1, 1901
Hon. Cornelius C. Beekman, Jacksonville .....	April 1, 1903
Hon. Cyrus A. Dolph, Portland .....	April 1, 1903
Hon. William Smith, Baker City .....	April 1, 1905
Hon. Robert S. Bean, Salem .....	April 1, 1905
Hon. Charles Hilton, The Dalles .....	April 1, 1905
Hon. Samson H. Friendly, Eugene .....	April 1, 1907
Hon. Charles B. Bellinger, Portland .....	April 1, 1909
Hon. Nehemiah L. Butler, Monmouth .....	April 1, 1911

## OFFICERS OF THE REGENTS.

Hon. Robert S. Bean, President.

Mr. A. Guy Hovey, Treasurer.

Hon. Joshua J. Walton, Secretary.

## EXECUTIVE COMMITTEE.

Hon. Samson H. Friendly, Chairman.

Hon. Robert S. Bean.

Hon. Cyrus A. Dolph.

THE University of Oregon is a State institution, and a part of its general educational system. It comprises the following departments: THE GRADUATE SCHOOL; COLLEGE OF LITERATURE, SCIENCE AND ARTS; COLLEGE OF SCIENCE AND ENGINEERING; COLLEGE OF MEDICINE; COLLEGE OF LAW. The Colleges of Science and Engineering, Literature and Arts are located at Eugene. The Colleges of Medicine and Law, while virtually also at Eugene, are practically carried on at the City of Portland, because of the obvious advantages to be found in a metropolis for the successful prosecution of medical and legal courses.

## DEPARTMENTS OF THE UNIVERSITY.

THE GRADUATE SCHOOL Advanced courses leading to the second and third degrees.

THE COLLEGE OF LITERATURE, SCIENCE AND THE ARTS contains the general groups of studies leading to the degree of Bachelor of Arts. These courses cover four years.

THE SCHOOL OF COMMERCE offers a four years' course, with special reference to administration of large commercial and manufacturing interests.

THE COLLEGIATE COURSE IN LAW AND JOURNALISM prepares for the study of Law, and a special training in history and economics in preparation for journalism.

THE 'TEACHERS' COURSE is an advanced course for those intending to fit themselves for positions of supervision and teaching in departments of education

THE COLLEGE OF SCIENCE AND ENGINEERING contains the courses in Science and Engineering that lead to the degree of Bachelor of Science and Civil, Sanitary, Electrical and Mining Engineering. These courses cover four and five years.

For further information relating to the College of Letters, etc., address

UNIVERSITY OF OREGON,

Eugene, Oregon.

THE SCHOOL OF LAW offers a two years' course leading to the degree of Bachelor of Laws.

For further information address.

PROF. R. H. THORNTON,

Portland, Oregon.

THE SCHOOL OF MUSIC offers instruction in various branches of instrumental and vocal music and in the theory of music.

For further information address

UNIVERSITY OF OREGON,

Eugene, Oregon.

## COLLEGE OF MEDICINE

---

### FACULTY

---

FRANK STRONG, PH. D.  
President.

---

HENRY E. JONES, M. D.  
Emeritus Professor of Clinical Gynæcology.

---

SIMEON EDWARD JOSEPHI, M. D.  
Dean of the Faculty; Professor of Obstetrics and Nervous Diseases.

HOLT COUCH WILSON, M. D.  
Professor of Principles and Practice of Surgery.

OTTO SALY BINSWANGER, PH. D., M. D.  
Professor of Chemistry and Toxicology.

KENNETH ALEXANDER J. MACKENZIE, M. D., C. M.,  
L. R. C. P. & L. R. C. S. Edin.  
Professor of Theory and Practice of and Clinical Medicine.

RICHARD NUNN, A. B., B. CH., M. D.  
Professor of Diseases of Eye, Ear, Nose and Throat.

JAMES FRANCIS BELL, M. D., L. R. C. P. London.  
Professor of Materia Medica and Therapeutics.

GEORGE MILTON WELLS, M. D.  
Professor of Pædiatrics.

WILLIAM HENRY SAYLOR, M. D.  
Professor of Diseases of Genito-Urinary Organs and Clinical Surgery

ANDREW JACKSON GIESY, M. D.  
Professor of Clinical Gynæcology.

WILLIAM JONES, M. D.

Professor of Clinical Surgery.

GEORGE FLANDERS WILSON, M. D.

Professor of Military and Operative Surgery and Clinical Surgery.

ERNEST FANNING TUCKER, A. B., M. D.

Professor of Gynæcology.

EDMOND JOHN LABBE, M. D.

Acting Professor of General and Descriptive Anatomy.

GEORGE BURNSIDE STORY, M. D.

Acting Professor of Physiology.

---

## SPECIAL LECTURERS.

---

ALBERT EDWARD MACKAY, M. D.

Lecturer on Bacteriology.

ANDREW CHARLES SMITH, M. D.

Lecturer on Clinical Surgery.

ALEXANDER DONALD MACKENZIE, M. D.

Lecturer Adjunct to Chair of Physiology.

ROBERT CLARK YENNEY, M. D.

Lecturer on Histology and Pathology.

EDWARD PAYSON GEARY, M. D.

Lecturer on Physical Diagnosis.

CORTES HOLIDAY WHEELER, M. D.

Lecturer on Hygiene.

JAMES OSCAR WILEY, M. D.

Lecturer on Osteology and Syndesmology.

JAMES CULLEN ZAN, M. D.

Lecturer on Dermatology.

HON. WILLIAM DAVID FENTON.

Lecturer on Medical Jurisprudence.

---

THOMAS WILLIAM BARRETT, M. D.

Demonstrator of Anatomy.

LOUIS ARTHUR SHANE, M. D.

Asst. Demonstrator of Anatomy.

## FIFTEENTH ANNUAL ANNOUNCEMENT.

---

THE Medical Department of the University of Oregon, which was established in 1887, in 1895 became a graded school occupying the advanced rank of those requiring from their students as a condition of graduation, attendance upon *four* full courses of lectures in a regular medical college. The result of this advance as shown in our work under the four courses system has proven eminently satisfactory.

The requirements of this school are in strict accordance with those laid down by the Association of American Medical Colleges, of which this school is a member.

Full particulars as to proper credit to be given for equivalents for the first year course, entrance examinations, etc., may be found under the head of "Requirements for Admission." Information as to credit for previous courses of lectures taken in other approved medical colleges, may be found under the head of "Requirements for Graduation" (*page 27*).

The opening lecture of the fifteenth regular annual session will be delivered at 9 a. m., Tuesday, October 1, 1901. Students are requested to be in attendance at the commencement of the session, so that they may not lose the benefit of knowledge to be derived from the opening lectures.

Examinations for matriculation may be arranged with the Dean at any time.

Special examinations in Latin and Physics for conditioned matriculates will be held during the first week of the session; during the same period the Fall examinations will be held for advancement to second, third or fourth year standing for those who failed to attain the requisite number of credits in the Spring examinations. This privilege does not apply to students who may have failed in their finals for the degree. For such there is each year but one examination, which is held in March.

## LOCATION.

The college building, located corner Twenty-third and Lovejoy streets, opposite Good Samaritan hospital, is a model of convenience, being furnished with all the aids to medical education which modern advancement requires. Laboratories for chemical, histological, pathological, bacteriological and other work are provided, and arrangements made for special attention to these important practical departments. The dissecting laboratory is most conveniently arranged, is light and airy and is furnished with artificial stone tables of special design and electric fixtures for artificial illumination.

The building is heated by hot water, lighted by gas and electricity, and provision made for excellent ventilation. The Twenty-third street electric cars pass the location every few minutes. To reach the college by this line take the Washington street car designated Twenty-third street. St. Vincent's new hospital, is only a short distance from the college, and with Good Samaritan hospital across the street the arrangement of college and hospitals for clinical work is a most convenient one.

C. H. LEWIS MEMORIAL.

GOOD SAMARITAN HOSPITAL.

MEDICAL DEPARTMENT OF THE UNIVERSITY OF OREGON.

## HOSPITAL CLINICS.

Instruction in medicine and surgery, to be efficient, must combine didactic and clinical teaching, and no opportunities for the last named class of studies are in any sense equal to those offered by the wards of a general hospital.

Our connection, through members of the faculty, with St. Vincent's and Good Samaritan hospitals, is such as to afford the most enlarged advantages for clinical instruction in the wards of those institutions, members of the medical staff of each being also members of the college faculty.

St. Vincent's new hospital is located only a few blocks from the college building on a tract of five acres. The portion now completed and occupied is 260 feet long, an average of 60 feet wide and is 6 stories in height including the basement. It contains 350 beds and is admirably fitted, in other respects, with the most modern furnishings and appliances.

Good Samaritan Hospital is delightfully located near the foot of the western hills. It has recently added a large brick wing which with the portion of the older building still remaining contains nearly 200 beds.

These hospitals are rich in clinical material of all kinds.

These two hospitals afford opportunities to the students of this college for clinical work and instruction unequaled anywhere in the Northwest.

Their close proximity to the college clusters the buildings for both didactic and clinical instruction, so that the necessity for the student to travel long distances in order to properly carry on his work is overcome and thus much valuable time saved to him.

Hospital clinics, medical or surgical, are held nearly every day of each week during the session. Opportunities are given students to make diagnosis of disease and prescribe treatment therefor; and operations of endless variety are performed (in presence of the class), according to the most advanced methods of modern surgery.

Special attention will be given to instructing the student in methods of examination for purposes of diagnosis of both medical and surgical cases and the use of appropriate instruments used for that purpose. In addition to clinics formerly given, a "Clinic Conference" in both Medicine and Surgery has been established which has proved very beneficial to the student.

Arrangements have been perfected for the obstetrical clinics. Each senior student will be given an opportunity to attend and conduct, under proper supervision, cases of midwifery. This affords under graduates a practical knowledge of midwifery, which must prove of great value in their future professional work.

These hospitals, already established and in successful operation for many years, thus present most excellent and unequaled facilities for the study of diseases at the bedside, and this branch of instruction will receive the very careful attention of the staff of clinical lecturers connected with the college.

Portland's geographical position is such that its hospitals receive patients from the surrounding territory over a large area of country, and the types of both medical and surgical diseases met with are as various as those to be found in much larger cities.

The faculty, while not disparaging the value of didactic lectures, makes the system of clinical instruction occupy a prominent place in the curriculum, and it will be the aim of its members to make the instruction in all departments as complete and efficient as possible.

In addition to didactic and clinical lectures, instruction will be given by practical work in the dissecting rooms and laboratories, and by repeated oral examinations.

The biological laboratory has been greatly enlarged and new instruments added. In addition to the work heretofore done, the laboratory courses will include a large amount of practical work in histology and pathology.

More attention is being given to the "Quiz" or recitation feature of the didactic lectures and there has been introduced a system of marking for recitations throughout the session which will count in averaging the percentage on final examinations.

#### SURGERY.

Surgery in all its various branches will be taught during the third and fourth years as per outline by means of systematic lectures and operations in the presence of the class. In addition there will be demonstrations of all the details of bandaging, dressings, and the application of the various forms of apparatus used in the treatment of diseases, accidents and deformities, including fractures and dislocations. Members of the graduating class will have opportunities for practice in minor surgery, bandaging, etc., and subjects will be furnished for repeating all the usual surgical operations on the cadaver.

Prof. Holt. C. Wilson will deliver didactic lectures, on Principles and Practice of Surgery, and clinics in Surgery will also be given by Prof. W. H. Saylor, Prof. Wm. Jones and Dr. Andrew C. Smith. Prof. Geo. F. Wilson will deliver a practical course upon operative and military surgery and will give special attention to clinics on fractures and fracture apparatus.

#### CHEMISTRY AND TOXICOLOGY.

During the first and second years Prof. Binswanger will treat these subjects with special attention to the fundamental principles of chemistry, medical and physiologic chemistry, physics and poisons.

The lectures will be fully illustrated by experiments, and a well equipped chemical laboratory will aid materially in the practical instruction of students in urinary analysis and other chemical examinations. A course of practical laboratory work by students is an essential of the requirements.

#### THEORY AND PRACTICE OF MEDICINE.

During the third and fourth years, as per outline,

Prof. Mackenzie will bring into prominence, in this branch, the essentials of theoretical and practical medicine, dwelling more particularly upon those subjects which will be likely to prove of most substantial use to the young practitioner, while not neglecting theoretical essentials. Teaching in this branch will be illustrated by clinics at the college and hospitals. Prof. Wells will deliver lectures upon Diseases of children. Prof. Josephi upon Diseases of the Nervous System. Dr. Wheeler upon Hygiene and Dr. Geary upon Physical Diagnosis. Prof's. Bell and Mackenzie will hold medical clinics at St. Vincents Hospital and Prof. H. C. Wilson at Good Samaritan Hospital.

#### ANATOMY.

Prof. Labbe will give instruction in General and Descriptive Anatomy. This subject will be considered during first and second years and finished at the end of the second year. These lectures will be illustrated by actual dissections, charts and drawings, and special attention will be given to the surgical relations of the subject. During the first year a special course on Osteology and Syndesmology by Dr. Wiley will be completed.

Special arrangements have been made for storing dissecting material, so that no shortage need be apprehended. A sufficient supply for the beginning of the course will be on hand and utilized as soon as desirable. The Demonstrator will be on duty daily (except Saturday) as per schedule of lectures, as special attention will be given to this branch during first and second years.

#### MATERIA MEDICA AND THERAPEUTICS.

Prof. Bell will direct attention during first and second years to remedial agents and to the actions of medicines proper, with particular reference to their practical application. Specimens of the various medicines will be exhibited to the class and attention given to Electro-therapeutics.

#### BACTERIOLOGY.

Dr. A. E. Mackay will deliver practical lectures on Bacteriology to fourth year students.

The Bacteriological Laboratory is supplied with all the necessary apparatus including incubators and sterilizers with thermostats and thermometers for a very full course.

Each student receives instruction in Bacteriological technique including best methods of examining sputum, staining etc., and a number of different bacteria will be cultivated and studied, such as Typhoid, Diphtheria, Cholera, Tubercle, etc.

#### MICROSCOPY, HISTOLOGY AND PATHOLOGY.

Dr. Yenney will deliver a practical course on the use of the microscope, histology and pathology. This will include the study of microscopical examinations of pus, blood, urine; etc.

To illustrate the lectures on histology and pathology a course will be given on section cutting, staining, mounting etc.

Histology will be considered during the second year and pathology by third year students. This course will be thoroughly practical and will be taught almost exclusively by laboratory methods. Students will make their own mountings, under proper supervision, for permanent preservation.

#### OBSTETRICS.

This subject will be taught during second and third years as per outline. Prof. Josephi will illustrate the lectures upon this branch by charts, diagrams, specimens, clinical work, etc. All the principal obstetric operations will be demonstrated on the manikin in presence of the class, and members of the graduating class will be required to perform certain operations and instrumental applications on the manikin before the class.

Opportunities for clinical work will be furnished to the graduating class, and labor cases will be entrusted to individual members under proper direction, thus insuring an eminently practical knowledge of this important branch.

## GYNAECOLOGY.

This branch will be taught didactically during third and fourth years by Prof. Tucker. Prof. A. J. Giesy will give clinics in Gynæcology once each week at Good Samaritan Hospital. Practical instruction will be given in the use of the speculum and other instruments for the diagnosis and treatment of diseases peculiar to women, and every opportunity given for students to familiarize themselves with their use and application.

## PHYSIOLOGY.

Lectures upon this subject will be delivered during first and second years by Prof. Geo. B. Story and Dr. A. D. Mackenzie and will be illustrated by demonstrations which will occupy a prominent place.

## DISEASES OF THE NERVOUS SYSTEM.

Lectures on Nervous Diseases including Insanity will be delivered by Prof. Josephi during fourth year. In this course special Nervous Diseases not included in the lectures of others will be dwelt upon.

OPHTHALMOLOGY, OTOLOGY, RHINOLOGY AND  
LARYNGOLOGY.

Prof. Nunn will deliver lectures upon these subjects to third and fourth year students and will give special attention to methods of diagnosis and treatment of diseases of the parts involved. Practical clinical training in the use of the ophthalmoscope, specula, laryngoscope and instruments for local applications, will be given. Clinics in Good Samaritan Hospital.

## GENITO-URINARY DISEASES.

Prof. Saylor will, in addition to clinics on surgery at the Good Samaritan hospital, deliver didactic lectures on Diseases of the Genito-Urinary Organs during third and fourth years. Lectures will be illustrated by drawings, models, etc., and numerous cases at the bedside in the hospital. Practical instructions in the use of instruments will be given.

## PAEDIATRICS.

Prof. G. M. Wells will bring before the students during third and fourth years a wide range of subjects in connection with this chair. From the first hour of life the infant requires a special study. Its diet and environment are of paramount importance in the first few years of life. The great question of schooling and school hygiene will be dealt with. The alarming increase of myopia among the young appeals to this chair for prevention as no other. The relation of paediatrics to the several branches of scientific medicine will be emphasized.

The surgery of infancy and childhood, manifestly so unique, will receive its share of attention.

## DERMATOLOGY.

Dr. J. C. Zan will deliver lectures on Dermatology during the third year. The exhibition of illustrative cases will form a prominent feature.

## MEDICAL JURISPRUDENCE.

Hon. W. D. Fenton will deliver lectures embracing the more essential points of this interesting branch of medicine during the fourth year.

## PHYSICAL DIAGNOSIS.

Dr. Geary will give special instruction on this important subject, giving prominence to topographical examinations, exemplary sounds, etc., and using clinical material for demonstrations.

## HYGIENE.

Dr. Wheeler will deliver a course on Hygiene during the year. The subject will be treated from a practical standpoint.

## LIBRARY.

A medical library, known as "The R. B. Wilson Library" has been established at the college building. The nucleus for this is a gift of the medical libraries of the late Dr. R.

B. Wilson and Dr. Rodney Glisan. This has been added to by gift from the Federal Government and will be further enlarged from time to time. Students will be allowed the use of books (not to be removed from the building) under such rules as the college may prescribe.

NOTE.—All students are *privileged* to attend all didactic lectures, but only such as are laid down in the schedule are compulsory.

The following is an outline of the work :

#### FRESHMAN YEAR.

Anatomy, with dissections,  
General Chemistry,  
Materia Medica and Pharmacy,  
Physiology.

Examinations at the end of year in Osteology and Syndes-mology, Principles of Chemistry, Elementary Materia Medica, Physiology (Prox. Principles and the Blood.)

#### SOPHOMORE YEAR.

Anatomy, with dissections; finished,  
Normal Histology; finished,  
Physiology; finished,  
Chemistry, with laboratory work; finished,  
Materia Medica and Therapeutics; finished,  
Microscopy,  
Hygiene,  
Obstetrics (Pelvic Anatomy Embryology and Normal Labor),  
Physical Diagnosis,  
Clinical Medicine.

Examinations at end of year : Anatomy (final); Histology (final); Physiology (final); Chemistry (final); Materia Medica and Therapeutics (final); Hygiene; Obstetrics; (Pelvic Anatomy, Embryology and Normal Labor.)

## JUNIOR YEAR.

Theory and Practice of Medicine, General Therapeutics,  
Principles and Practice of Surgery and Bandaging.  
Pathology with Laboratory Work,  
Pædiatrics,  
Dermatology,  
Gynæcology,  
Genito-Urinary Diseases,  
Physical Diagnosis,  
Ophthalmology and Otology,  
Obstetrics,  
Clinics, all.

Examinations in Principles of Medicine; Principles of  
Surgery ; Pathology (final); Gynæcology ; Physical Diag-  
nosis ; Obstetrics (final) ; Dermatology ; Diseases of Genito-  
Urinary Organs ; Ophthalmology and Otology.

## SENIOR YEAR.

Medical Jurisprudence,  
Theory and Practice of Medicine,  
Principles and Practice of Surgery,  
Military and Operative Surgery,  
Clinics, all,  
Gynæcology,  
Genito-Urinary Diseases,  
Ophthalmology and Otology,  
Rhinology and Laryngology,  
Bacteriology, with Laboratory Work,  
Pædiatrics,  
Insanity and Diseases of Nervous System.  
Examinations : Final in above.

## TEXT BOOKS.

The following list of books is given as a guide to the student (latest editions preferred):

FOR STUDY		FOR REFERENCE	
Anatomy .....	Gray.	Morris, Gerrish.	
Physiology .....	Waller.	Kirk, Yeo, Foster, Flint, Dalton	
Chemistry .....	{ Withaus.	Bartley, Semple's "Aids to Chemistry."	
	{ Fowne.		
	{ Purdy Pract.		
Materia Medica.....	{ Urinalysis, etc.		
	{ White & Wilcox.	Butler, Shoemaker, Potter.	
Surgery.....	{ Wharton &	International Text Book.	
	{ Curtis.	Senn's Principles of Surgery.	
Theory and Practice..	{ Osler.		
	{ Anders.	Pepper, Reynolds.	
	{ Clifford Allbutt.		
Diagnosis .....	Tyson.	Da Costa.	
Obstetrics .....	Hirst.	Davis. Lusk.	
Diseases of Children..	{ Taylor &	Starr's American System Dis. of Children,	
	{ Wells.		
Gynæcology .....	Dudley.	Howard Kelly, Emmett.	
Ophthalmology.....	Swanzy.	Noyes, Buck, Fuchs.	
Otology, Laryngology..	{ Bishop's Dis. of		
	{ Ear, Nose and		
Histology .....	{ Throat.		
	{ Piersol.	Bohm, Davidhoff & Huber.	
Pathology.. .....	Mallory & Wright.		
Dermatology .....	Crocker.	Morrow.	
Toxicology .....	Taylor.		
Orthopædic Surgery...		Sayre.	
Nervous diseases ....	{ Oppenheim.	Gowers.	
	{ Gordinier's Anat-		
	{ omy of Nervous		
Insanity .....	{ System		
	{ Compendium of		
	{ Insanity, Chapin.		
Genito-Urinary Diseases	Lydston.	White & Marten, Taylor, Sturgis & Cabot.	
Medical Jurisprudence	Reese.	Tidy.

Bacteriology ... ..	{ Mallory & Wright.	Sternberg, Levy, Klemperer.	
	{ McFarland		
Latin .....	{ Elements of Lat-		
	{ in by Crothers		
	{ & Bice.		

## HOSPITAL APPOINTMENTS.

Arrangements have been perfected by which the college has in its gift five appointments each year of house surgeons. Two to the Good Samaritan Hospital, two to St. Vincent's Hospital, both in Portland, and one to St. Joseph's Hospital, Tacoma, Wash. Information regarding these appointments will be furnished by the Dean on application. Each appointment is for one year, during which time board and lodging will be furnished free at the hospital. An excellent opportunity is thus afforded to the graduate to acquire in the wards of a well equipped hospital, without any expense, a practical knowledge by clinical experience and actual practice.

## PRIZES.

## SAYLOR MEDAL.

The Saylor Gold Medal founded by Prof. Saylor, will be awarded to the graduate who shall have obtained the highest total of credits for the four year's work (whether taken in regular sequence or not.) Provided: Credits in medical subjects shall have been obtained in some department or departments of the University of Oregon, and the student's mark in his first examination in any subject or part of a subject (whether or not he passes the subject at that examination) shall be the mark considered in making up his total in competition for the medal.

## THE ANATOMY MEDAL.

The Anatomy Gold Medal, will be awarded to the undergraduate who obtains the highest total mark in Anatomy in final examination in that branch. This mark is the total of Osteology, Histology and Anatomy. Provided such mark is obtained in the University of Oregon under conditions similar to those governing the Saylor Medal. The medal will be presented to the winner only at the time of graduation from this college.

## MEDALISTS 1900-1901.

SAYLOR MEDAL—Nellie S. Vernon, M. D.

KOEHLER MEDAL—George W. Biggers.

## REQUIREMENTS FOR ADMISSION.

This school is a member of the Association of American Medical Colleges and will conform to its requirements as set forth in the following extract from the constitution of the Association:

## ARTICLE III.

SECTION 1.—Each college holding membership in this Association shall require of each student, *before admission* to its course of study, an examination the minimum of which shall be as follows:

1. In *English*, a composition on some subject of general interest. This composition must be written by the student at the time of the

examination, and should contain at least 200 words. It should be criticised in relation to thought, construction punctuation, spelling and handwriting.

2. In *Arithmetic*, such questions as will show a thorough knowledge of common and decimal fractions, compound numbers, and ratio and proportion.

3. In *Algebra*, such questions as will bring out the student's knowledge of the fundamental operations, factoring and simple quadratic equations.

4. In *Physics*, such questions as will discover the student's understanding of the elements of mechanics, hydrostatics, hydraulics, optics and acoustics.

5. In *Latin*, an examination upon such elementary work as the student may offer, showing a familiarity usually attained by one year of study; for example, the reading of the first 15 chapters of Caesar's Commentaries, and the translation into Latin of easy English sentences involving the same vocabulary.

SEC. 2.—In place of this examination, or any part of it, colleges, members of this Association, are at liberty to recognize the official *certificates of reputable* literary and scientific colleges, academies, high schools and normal schools, and also the medical student's certificate issued by any State examining board covering the work of the foregoing entrance examination.

SEC. 3.—Colleges, members of this Association, may allow students *who fail in one or more branches* in this entrance examination the privilege of entering the first year course, but such students shall not be allowed to begin the second course until the entrance requirements are satisfied.

SEC. 4.—Colleges, members of this Association, are free to honor official *credentials issued by medical colleges of equal requirements*, except in the branches of study embraced in the last year of their own curriculum.

SEC. 5.—Candidates for the degree of Doctor of Medicine in the year 1899 and thereafter shall have attended at least *four courses* of medical instruction, each course of at least six month's duration, no two courses of which shall have been in the same calendar year.

SEC. 6.—Colleges, members of this Association, are free to give to students who have met the entrance requirements of the Association, additional *credit for time* on the four-year course as follows: (a) To students having the A.B., B. S., or equivalent *degrees* from reputable literary colleges, one year of time. (b) To graduates and students of

colleges of *homeopathic* or *eclectic* medicine, as many years as they attended those colleges, provided they have met the previous requirements of the Association and that they pass an examination in materia medica and therapeutics. (c) To graduates of reputable colleges of *dentistry*, *pharmacy* and *veterinary* medicine, one year of time.

NOTE—*It is earnestly recommended that the student intending to take the entrance examination, make a careful review of the studies mentioned in order that he may be spared the humiliation of rejection.*

Before admission, every student is required to obtain the Dean's receipt for the payment of the matriculation fee. It will therefore be necessary for the applicant to present himself at the office of the Dean, register his name as a student in the Medical Department, and pay his fee. New students will be assigned seats in the order of date of matriculation.

---

## REQUIREMENTS FOR GRADUATION.

The candidate for the degree of Doctor of Medicine must be of good moral character and twenty-one years of age. He must have studied medicine under a regular practitioner four years, including attendance upon lectures, and attended in a regular medical college authorized to confer the degree of M. D., four full courses of lectures, no two of which shall have been delivered within twelve months, (unless admitted to advanced standing as per constitution of the Association of American Medical Colleges,) the last of which must have been in this college; and must exhibit his tickets or other adequate evidence of attendance to the Dean of the Faculty. He must present to the Dean satisfactory evidence of having dissected the entire cadaver. He must have attended at least two courses of Dissections and Clinical Instruction. He must present to the Dean satisfactory evidence of time of study, laboratory work and moral character. He must have passed successfully the examinations, prescribed by the Faculty, and have paid all fees due the College.

The degree will not be conferred upon any candidate who absents himself from the public commencement exercises without special permission of the Faculty.

The diploma given to graduates is that of the University of the State of Oregon, duly signed by the President and Secretary of the Board of Regents, as well as by the Medical Faculty.

Women will be admitted to matriculation, instruction and graduation on the same terms as men.

## COLLEGE EXPENSES.

ALL FEES ARE PAYABLE IN ADVANCE.

All students whose work is in the *chemical* laboratory will be required to deposit \$3.00 and those in the *histological*, *pathological* or *bacteriological* laboratory \$5.00 for breakage. With the exception of \$1.00 for each laboratory course, these fees are returnable if no breakage is charged.

To those who enter at beginning of first year:

First year: Matriculation.....	\$5 00
Fee for course.....	130 00
One-quarter examination fee.....	7 50
Second year: Fee for course . . . . .	130 00
One-quarter examination fee.....	7 50
Third year: Fee for course . . . . .	100 00
One-quarter examination fee.....	7 50
Fourth year: Fee for course.....	Free
One-quarter examination fee.....	7 50

To those entering at beginning of second year (not having taken a course in this college):

Second year: Matriculation.....	5 00
Fee for course . . . . .	130 00
One-third examination fee.....	10 00
Third year: Fee for course . . . . .	130 00
One-third examination fee . . . . .	10 00
Fourth year. Fee for course . . . . .	30 00
One-third examination fee.....	10 00

To those who enter beginning of the third year (not having taken a course in this college):

Third year: Matriculation . . . . .	5 00
Fee for course . . . . .	130 00
One-half examination fee . . . . .	15 00
Fourth year: Fee for course . . . . .	50 00
One-half examination fee . . . . .	15 00

To those who enter beginning of fourth year (not having taken a course in this college):

Fourth year: Matriculation.....	5 00
Fee for course.....	100 00
Examination fee.....	30 00

One full scholarship and two half-scholarships are open to graduates of the University of Oregon with the degree of A. B. or B. S., of not more than two years standing. Particulars will be furnished upon application to either Prof. Washburn, Eugene, or Prof. Josephi, Portland.

## BOARDING.

Good board with rooms and all the usual accommodations, can be obtained in the vicinity of the college at rates varying from \$4 to \$6 per week.

## DIRECTIONS TO THE STUDENT.

Students will matriculate at the office of the Dean, Prof. S. E. Josephi, Dekum Building, Third and Washington streets, Portland, Or.  
For further particulars address

S. E. JOSEPHI, M. D.,  
Room 610, Dekum Bldg., Third and Washington Sts.  
PORTLAND OREGON.
